Documentation

O Why is it important?

O Your memory is only as good as your retrieval process

O Confuse different projects

O Too much data to even remember

O Someone else needs to know the information

What to do...

O What are you going to document?

    O Site construction... i.e. what modules enabled and their configuration

    O Site oddities .... i.e. changes made to modules to get them to work the way you need it to (These modifications if applicable should be suggested to the module developer)

    O Site content ... i.e. what are the special content types, taxonomy/who is using it, context usage

Who and How Big....

O Who is the target audience?
- O Content editors
- O Owners
- O Other developers

O How big or small is your site?
- O Few Content types to process
- O Many parts to a page for a single purpose
- O Many parts to a page for multiple purposes
- O Special features for the site

Other considerations

O What type of site are you supporting

    O Ecommerce

    O Educational

    O Informational

    O Combination of two or more
